

# Quality Management System Design

## Value to Business:

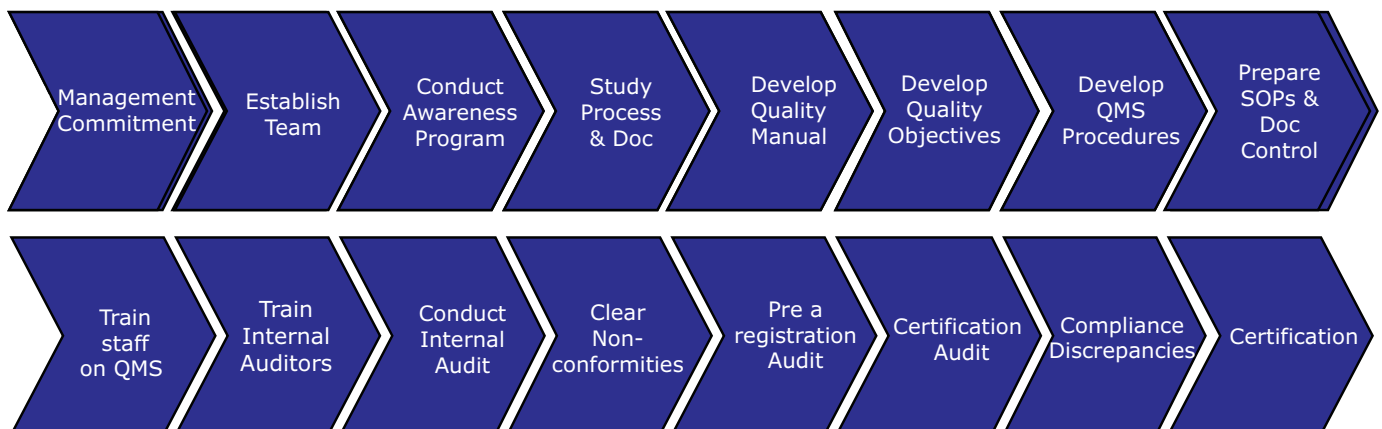

A quality management system (QMS) is a set of policies, processes and procedures required for planning and execution in the core business area of an organization. QMS integrates the various internal processes within the organization and intends to provide a process approach for project execution. QMS enables the organizations to identify, measure, control and improve the various core business processes that will ultimately lead to improved business performance.

## Objectives

1. Reduce wastages by designing best in class processes
2. Reduce risk in process by standardizing processes
3. Reduce human intervention by concentrating on the process rather human discretion
4. Improve customer confidence on product and service
5. Use Quality Management Certification as tool for marketing your product or services.

## ProPart Service Details

1. Design Process Flows
2. Develop Quality Manual
